

Abhilash Venkatesh

Lead Application Developer | Full-Stack & Distributed Systems Specialist

Melbourne, VIC, Australia | abhilashfeb30@gmail.com | +61 484 192 055 | linkedin.com/in/abhilash93

PROFESSIONAL SUMMARY

Lead Application Developer with 11+ years of full-time employment in software engineering roles spanning Australia and India. Currently employed full-time as Lead Application Developer at Fabric Group, Melbourne, VIC, Australia, since August 2023. Expertise in Java, Node.js, AWS cloud architecture, and microservices systems design. Demonstrated experience leading engineering teams of up to 8 engineers, architecting enterprise-scale distributed systems, and delivering complex software platforms across insurance, logistics, mobility, and retail industries. All employment has been full-time, permanent employment with direct reporting lines and managerial responsibilities.

TECHNICAL SKILLS

Languages: Java, Node.js, TypeScript, JavaScript, Ruby, Python

Frameworks & Libraries: Spring Boot, Dropwizard, Vert.x, RxJava, React, Vue.js, Ember.js, Express

Databases & Messaging: MySQL, MongoDB, Elasticsearch, Redis, OrientDB, Apache Kafka, ActiveMQ, Cloud Spanner

Cloud & DevOps: AWS (Lambda, DynamoDB, SQS, Step Functions, CloudFront, API Gateway, EC2), GCP, Docker, Ansible, Jenkins, Git

Testing: JUnit, Mockito, Gatling, Cucumber, Jest, Test-Driven Development (TDD)

Methodologies: Agile/XP, Continuous Integration/Delivery, Microservices, Domain-Driven Design

EMPLOYMENT HISTORY

Lead Application Developer *August 2023 – Present*

Fabric Group | Level 1, 520 Bourke Street, Melbourne VIC 3000, Australia

Employment Type: Full-Time, Permanent | Hours: 38 hours/week | Direct Reports: 6 engineers

Company: Fabric Group is an Australian technology consulting and digital delivery firm headquartered in Melbourne, VIC.

Client Engagement: MCL Insurance – August 2023 – Present

Technical lead and primary architect for the design and delivery of a white-label insurance portal for MCL's corporate insurance division, built on AWS serverless infrastructure.

- Designed full system architecture on AWS using serverless-first approach: Lambda, DynamoDB, SQS, Step Functions, CloudFront, and API Gateway, ensuring scalability and high availability
- Led and managed a team of 6 software engineers across front-end and back-end workstreams, conducting performance reviews, sprint planning, and technical mentoring
- Built event-driven workflows using SQS and Step Functions to orchestrate complex insurance policy and claims processing logic, reducing processing time and improving reliability
- Integrated Splunk for centralised logging, monitoring, and alerting across all Lambda functions and API endpoints, enabling proactive incident detection
- Served as primary technical liaison to MCL stakeholders; presented architecture decisions and project progress at steering committee reviews.
- Established CI/CD pipelines and infrastructure-as-code practices enabling low-risk, repeatable deployments across development, staging, and production environments
- Drove continuous improvement through cost optimisation, observability enhancements, and iterative architectural refinements

Senior Consultant / Senior Software Engineer *August 2022 – July 2023 (1 year)*

Braves Technologies | India

Employment Type: Full-Time, Permanent | Hours: 40 hours/week

Company: Braves Technologies is a technology services and software consulting company based in India.

Client Engagement: Australia Post – Event Management & Reporting System August 2022 – July 2023

Senior engineering contributor on a greenfield platform to replace Australia Post's legacy event management infrastructure, built on GCP.

- Architected and built microservices using Java and Spring Boot on GCP, processing high-volume event data with Cloud Spanner as the primary data store
- Developed the Vue.js web platform, enabling real-time event tracking and management for internal Australia Post operations teams
- Implemented Redis-based caching strategies to reduce API response times and improve throughput under peak load conditions
- Collaborated with product owners and stakeholders to define technical requirements and translate business needs into engineering solutions

Lead Consultant / Software Architect December 2019 – August 2022 (2 years 9 months)

Rapido (Roppen Transportation Services Pvt. Ltd.) | Bengaluru, Karnataka, India

Employment Type: Full-Time, Permanent | Hours: 40 hours/week | Direct Reports: 8 senior engineers

Company: Rapido is India's largest bike taxi platform (Roppen Transportation Services Pvt. Ltd.), serving millions of daily users across India.

- Managed and evolved a portfolio of 30+ microservices handling millions of daily ride requests with high availability and sub-100ms API response times
- Led architectural planning and technical design sessions for new product features, resolving technical uncertainty before development commencement
- Designed and built core platform services: Location Service, Order Management System, and Loyalty/Rewards Framework using Vert.x (Java 8), Node.js, Kafka, and Elasticsearch
- Drove performance engineering initiatives, achieving a 40% improvement in system throughput through optimised event streaming and data indexing
- Managed, mentored, and upskilled 8 senior engineers in distributed systems design, code quality, and Agile delivery practices
- Collaborated with product management and business stakeholders to translate roadmap priorities into technical delivery plans

Senior Consultant / Senior Software Engineer August 2014 – November 2019 (5 years 3 months)

ThoughtWorks Technologies India Pvt. Ltd. | Bengaluru, Karnataka, India

Employment Type: Full-Time, Permanent | Hours: 40 hours/week

Company: ThoughtWorks is a global technology consultancy headquartered in Chicago, USA, with major operations in India. BSE/NSE-listed company.

Client: Leading US Supermarket Chain – Content Management System March 2017 – November 2019

- Designed and built a React JS front-end and Node.js/Express REST API backend for a CMS managing product content and promotional campaigns for a nationwide US retail website
- Practised TDD and pair programming within an Agile/XP team to ensure high-quality, maintainable code

Shared Health Record – Health Information Exchange, Bangladesh (Pilot Project) January 2017 – May 2017

- Developed and deployed a microservices-based Health Information Exchange (HIE) enabling patient health records to be shared across hospitals nationwide in a low-resource setting
- Automated deployment pipelines using Ansible and a trained in-country technical team to independently operate and maintain the system

Client: US Communications & Networking Company – Enterprise Learning Platform August 2014 – December 2016

- Contributed to a 2+ year program building an enterprise digital learning and collaboration platform integrating e-learning, social networking, blogging, file-sharing, and expert discovery

- Built backend services in Java and Node.js using MongoDB, OrientDB, Redis, Apache Kafka, and Elasticsearch; developed front-end features in Ember.js
- Participated in system design reviews and contributed to architectural decisions across a large distributed engineering team

EDUCATION & QUALIFICATIONS

Bachelor of Computer Application (BCA)

University of Madras, Chennai, Tamil Nadu, India

ThoughtWorks STEP Programme (Structured Training & Entry Programme)

Two-year intensive 'work while you study' programme covering software engineering theory and applied practice. Completed in 2014.
